2 Key Advantages in Railway

1 Brief Introduction of TMT

Brief Introduction of TMT

First-Tier Subsidiary of CRRC

- Found in 1984
- Renamed as 'TMT' in 2001
- Listed in Shanghai Stock Exchange in 2002

Stock code 600458

- TMT is specialized in polymer materials research and engineering applications. The products are extend to various fields, such as rubber, plastics, composite materials, functional materials, etc.
- TMT , , .

Brief Introduction of TMT

1984

The rubber lab of Railway Ministry

1994

TMT Plastic Products Business Unit was established

2002

Listed in Shanghai

2006

Enter wind power industry

2007

Enter automotive industry

2011

Acquisition of Delkor

2014

Acquisition of BOGE

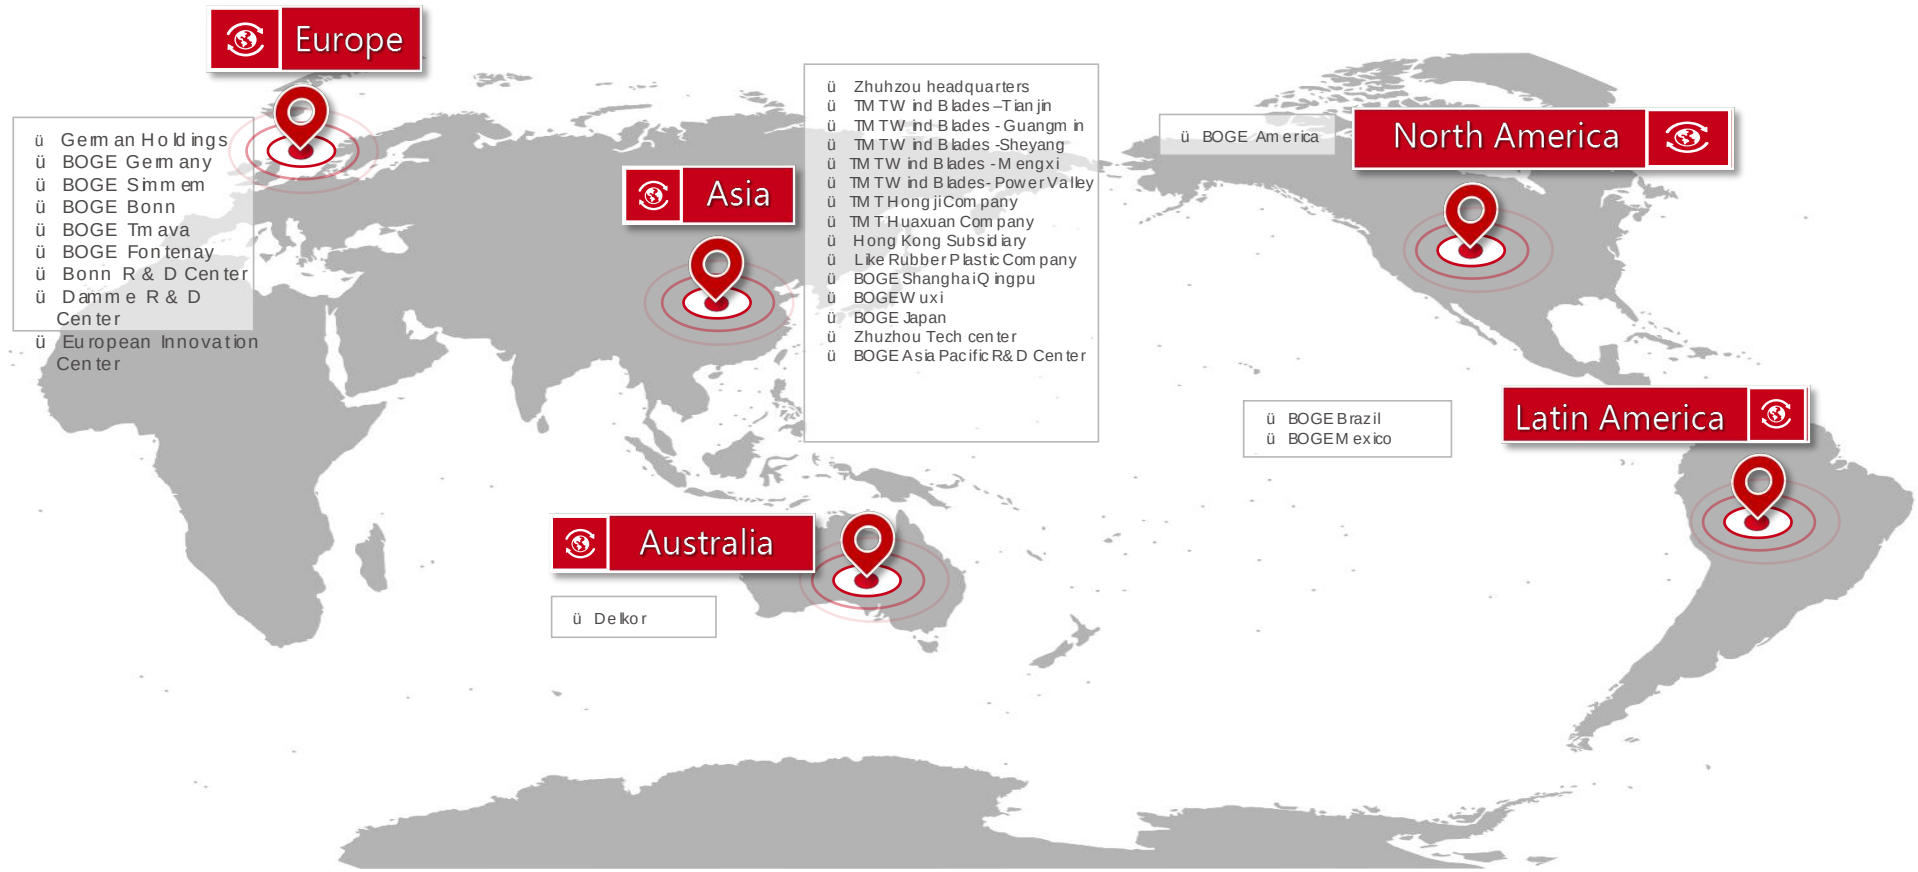
2021

Promoted to a Tier 1 subsidiary of CRRC

2022

Honor from China State Council as science reform demonstration enterprise

Brief Introduction of TMT

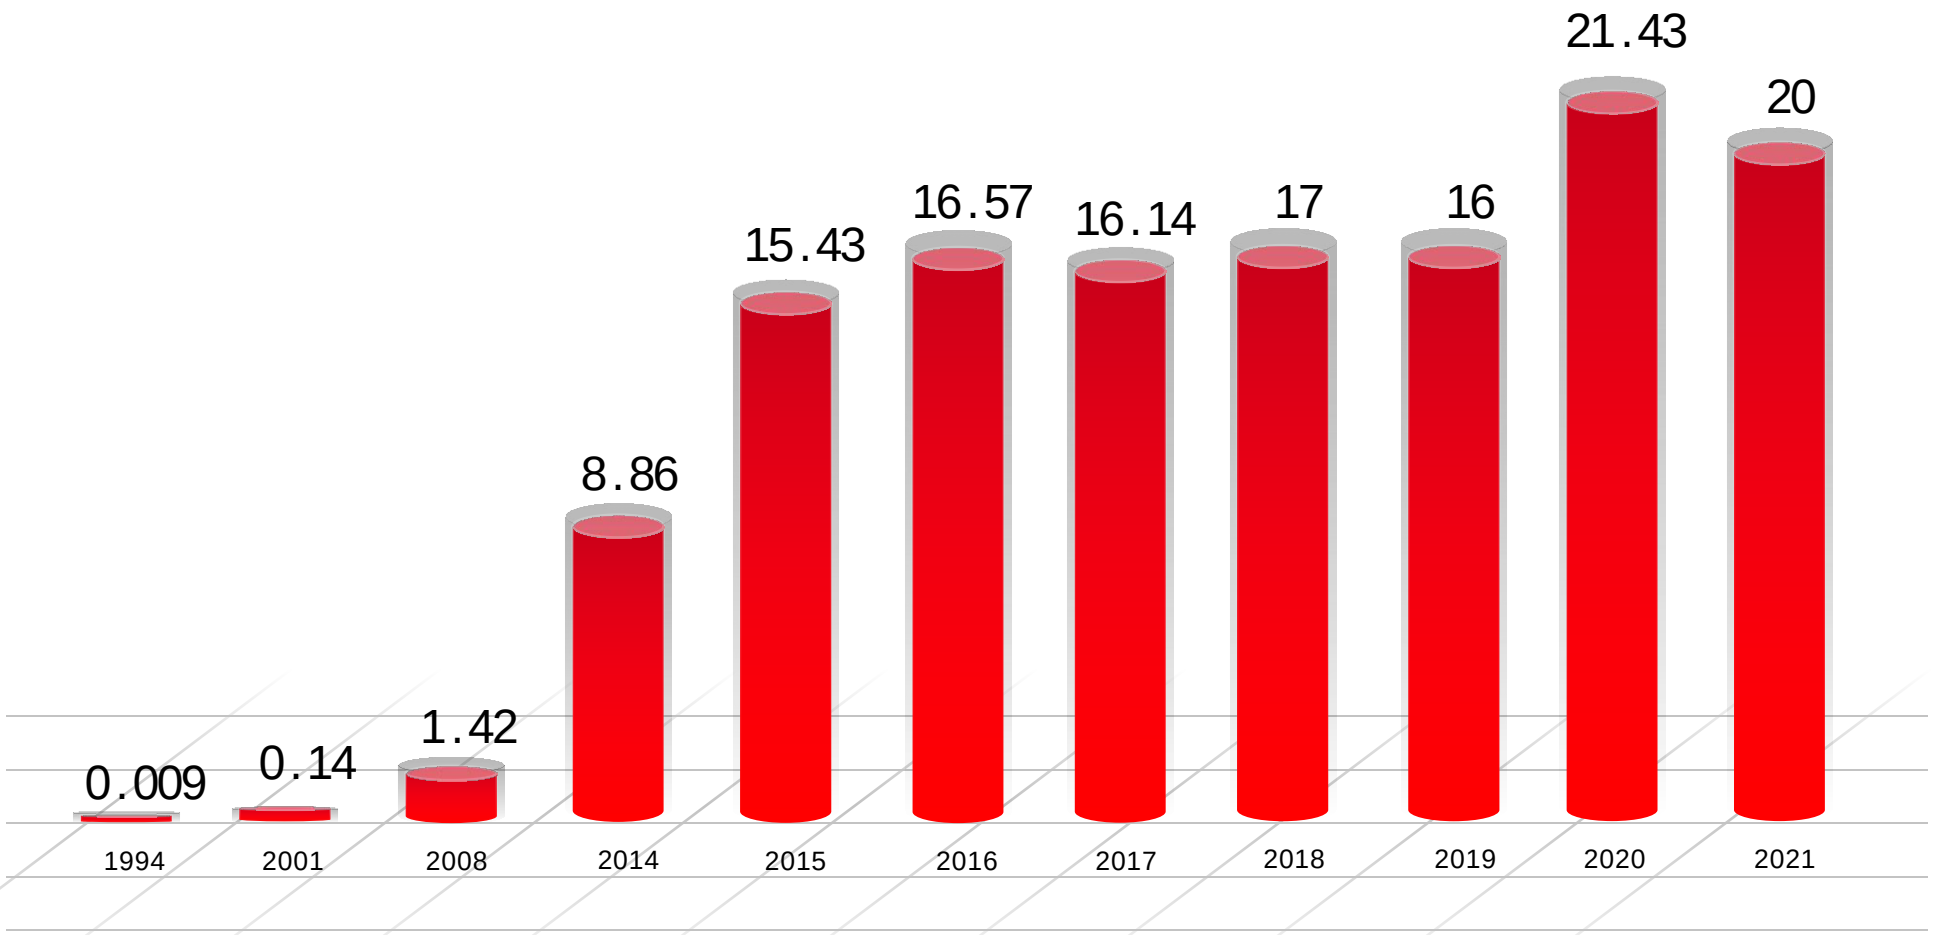


TMT has subsidiaries and offices in 10 countries around the world, including Germany, France, Slovakia, Mexico, Australia, Brazil and other countries, with a comprehensive internationalization index of over 40%.

10 . , 40% .

Yearly Sales

Unit: EURO 100 million



Five Pillar Industry Platforms

Cross-industry application, international operation

More than 30 production and logistics bases worldwide

The world's leading scale, complete varieties, first-class technology

5 , , 30 .

A leader in Polymer Material Industry

Rail transport	0.28+ Billion EURO
Industry& Engineering	0.22+ Billion EURO
Wind power	0.86+ Billion EURO
Automotive	0.79+ Billion EURO
New material others	0.43+ Billion EURO

2 Key Advantages in Railway

1 Brief Introduction of TMT

Key Advantages in Railway

TMT's R&D center were award:
TMT's R&D center :

National technology innovation platform 5+
:5+

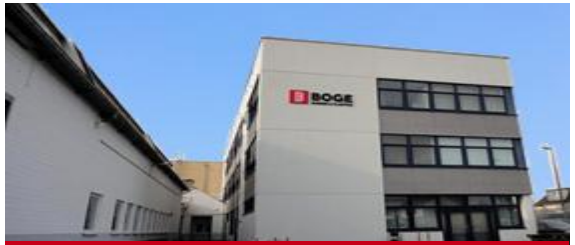
Provincial technology innovation platform 2+
:2+

Company Research Center 5+
:5+

Institute of Materials Technology and Engineering (Zhuzhou)

Asia Pacific R&D Center (Wuxi)

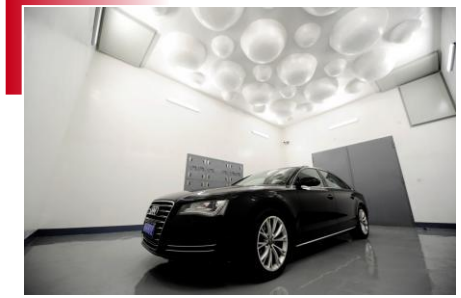
Dahmer R&D Center (Germany)



Bonn R&D Center (Germany)

Key Advantages in Railway

R&D | TestAbility | Quality System | SmartManufacture | Abundant Experience | MajorProduct



- CMA Accredited Laboratory
- ilac-MRA CNAS Accredited Laboratory
- The truck product filing laboratory designated by China Railway Inspection and Certification Center (CRCC)
- CCS & DNV GL Accredited Laboratory
- National Testing and Experiment Center

Key Advantages in Railway

TMT has passed ISO9001, ISO/TS22163, TS16949, CRCC railway products, French railway, German Railway, Belgian Railway, Amtrak and other certifications.

TMT ISO9001, ISO/TS22163, TS16949, CRCC , , , ,

.

Key Advantages in Railway

TMT railway factory is a national lever of "green factory" with an annual production capacity of 40,000 sets of air springs and 7 million pieces of rubber and metal parts.

Key Advantages in Railway

R&D | Test Ability | Quality System | Smart Manufacture | Abundant Experience | Major Product

Wide coverage of OEMs

OEMs .

Experience in wordwide

.

Experience in platform projects

.

Comprehensive product types

.

Key Advantages in Railway

TMT is the global industry standard setter in the field of rolling stock vibration and noise reduction, and the only one-stop system solution provider combine rolling stock, tract and bridge vibration control.

TMT ,

Anti-vibration and noise-reduction technology for vehicle

Lightweight technology for car body
